

EQUIA Forte® HT & MI Paste® ONE

Restore, Recharge, Remineralize

EQUIA Forte® HT

Cost-effective long term restorative alternative.

MI Paste® ONE

Anti-cavity toothpaste with bio-available calcium, phosphate and fluoride.

Since 1921

100 years of Quality in Dental

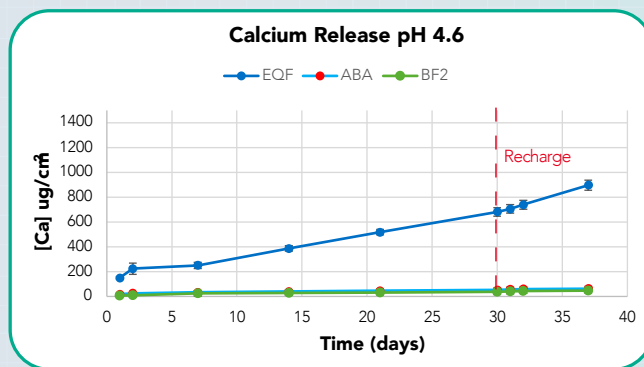

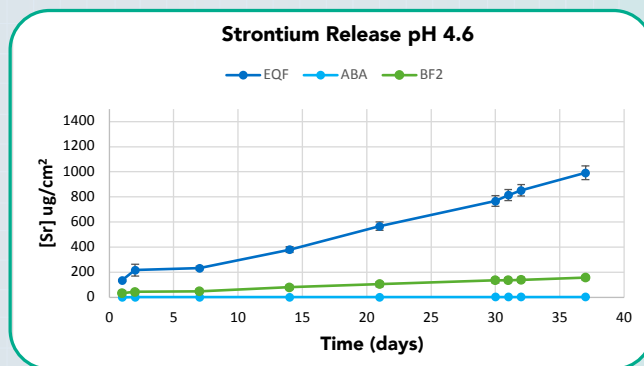

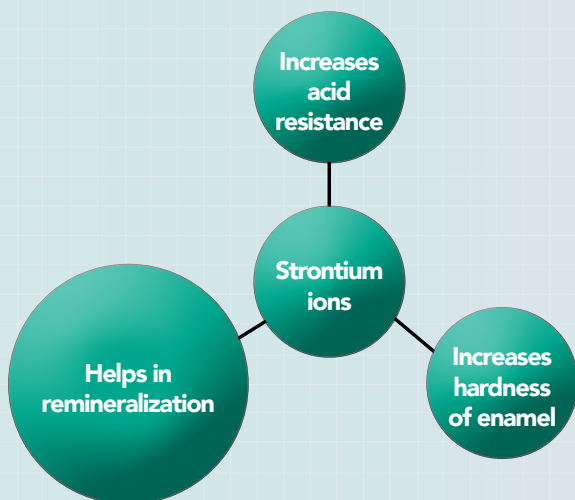

Don't Just Restore - Recharge!

You may know that glass hybrids offer a number of advantages. They work well in a moist environment, requiring no isolation. They form a chemical bond with dentin that provides excellent marginal seal. Plus, they offer a sustained release of fluoride over a long period, helping to heal and prevent caries lesions. But what you might not know is that when they are paired with the new MI Paste® ONE, you can extend the therapeutic remineralizing benefits to the whole mouth. Transform your restorative procedures into a remineralizing tour de force with EQUIA Forte® HT and new MI Paste® ONE.

- High fluoride release at tooth-restorative interface by EQUIA Forte® HT
- Optimal marginal seal for long-term resistance to microleakage by EQUIA Forte® HT
- Calcium and fluoride rechargeable EQUIA Forte® HT restorations
- Remineralization and sensitivity reduction by MI Paste® ONE
- Exceptional treatment for pediatric, elderly and high-caries risk patients

In addition to fluoride, GC glass hybrid products release strontium and calcium ions. Strontium ions aid in remineralization and help increase hardness of enamel and its acid resistance. A recent research study showed that EQUIA Forte® absorb and re-release calcium and fluoride from MI Paste® ONE.*

Therefore, these restorations can be recharged with calcium and fluoride when used in conjunction with MI Paste® ONE.

EQUIA Forte® HT Intro Kit

Contains: 48 EQUIA Forte® HT Capsules (Powder 0.4g, Liquid: 0.13g (0.10mL) per capsule), one EQUIA Forte® Coat (4mL) bottle, 1 CAVITY CONDITIONER (GC) (5.7mL).

453001 A1 453002 A2 453003 A3 453004 A3.5 453006 B1
453007 B2 453008 B3 453009 C4 453005 Assorted

EQUIA Forte® HT Fil Refill

Contains: 48 EQUIA Forte® HT Capsules (Powder 0.4g, Liquid: 0.13g (0.10mL) per capsule).

453010 A1 453011 A2 453012 A3 453013 A3.5 453014 B1
